Work Experience

Building Maintenance Worker

SH INTEGRATED SERVICES PTE. LTD. - Singapore

September 2021 to Present

- At SH I am a general construction worker doing building maintenance service work. My responsibilities are daily inspection and weekly or monthly scheduled inspection of building and surrounding landscape areas including :
 - detecting any faulty operations in the building for example kitchen, canteen, toilet, office, etc.
 - finding defective materials, and reporting, repairing, or replacing those such as faulty electric lighting, fan, sockets, switches, faucets, shower heads, touch-up paint, drywall repairing etc.
 - handyman tasks like unusual emergencies to maintenance, repairing, replacing and Other tasks assigned by the supervisor or coordinator.

General Construction Worker

Greatearth Construction Pte Ltd - Singapore

September 2020 to September 2021

At Greatearth, I have worked as a Scaffolding erector on construction sites and worked on the Mandai Crematorium and Columbarium projects. We worked as a team doing scaffolding erection and dismantling, making safety barricades and access ways and maintaining them, cleaning site rubble and other debris, pumping rainwater from floors, directing traffic in the site, refilling the fuel of site generators, responding to any emergency site works.

Load and unload materials.

We saved life and revenue by making the best quality safety guardrails, barricades, and access ways. Our project's accident ratio was zero.

General Construction Worker

Daewoo Engineering & Construction Co. Ltd. - Singapore
September 2019 to April 2020

At Daewoo I have worked here as a supply construction worker at both Stevens metro railway station and tunnel in the Thompson - Eastcoast Line (TE - 11) project in Singapore. There my duty and responsibility was site rubble and debris removal and applying mosquito spray, cleaning excessive water, maintenance of safety barricades and many more tasks.

General Construction Worker

Nylect Engineering Pte Ltd - Woodlands
April 2016 to March 2019

In this company I have started career as a supply construction worker in Singapore. My first project was Micron 10X project at Woodlands, Singapore.

Here my responsibility and duty was fitting and hanging cable trunks, laying cables in cable trunk. assisting electrician and helping Japanese Vendor to connect machines to DB boxes.

After my company's contract with Nylect finished then I move to Great World MRT station(TE 15) project under Tiong Seng - Dongah joint venture. Here my responsibility was cleaning site rubble, rubbish and other debris. Assisting safety supervisor to make safety barricades, access ways, and dismantle concrete forms and etc.
